

**ABSTRACT OF THE DISCLOSURE**

5       A school document storage system for providing efficient and organized storage  
6   of a child's school documents based upon grade level. The school document storage  
7   system includes an outer housing having a cover member, and a plurality of inner  
8   compartments removably positioned within an interior of the outer housing. A  
9   transparent pocket is preferably positioned within the front portion of the outer  
10   housing for receiving a picture or other display item. A plurality of closure apertures  
11   are within the cover member that removably receive closure members attached to the  
12   upper sides of the outer housing. The cover member preferably has an upper member,  
13   a front member extending from the upper member and a pair of side members  
14   extending from the upper member.
